PRIMER PFR is an extremely versatile product with various possibilities of usage. It regularizes and conditions the absorption on leather surface when polished. This property may also be achieved upto some extent by kiss plating.

PRIMER PFR softens the hide / skin surface, preparing the same for the subsequent coatings. It is characterised by a high coating and uniforming power. It also masks the defects particularly on the low grain leathers and prepares the leather to subsequent mechanical operations.

PRIMER PFR gives a very natural and waxy touch and enhances the burnishing effect of leather. It is characterised by good matting power and good behaviour to plate.
