

## HARYANA

### WAXOL WP

**WAXOL WP is a blend of synthetic / natural oils & special waxes which provides dark pull-up and warm waxy feel to the coated leathers.**

#### CHARACTERISTICS:

**Appearance** : Creamish Opaque

**Nature** : Synthetic and Natural Oils  
Solvent Dilutable

**Solid Content** : 92 ± 1%

**pH 10% Emulsion** : N.A.

**Shelf Life** : Six months

**WAXOL WP** is solvent dilutable blend of special oils and waxes which is designed for providing dark pull-up effect on leather.

**WAXOL WP** is normally applied on leather with the help of heated roller coater. Coated leathers are dried and aired off over night and then plated at 100°-120°C/50 bar or Finiflexed at 130°C to get the desired effect. A second coat and subsequent plating may also be required for heavily snuffed leathers or for leathers with high / uneven absorption.

**WAXOL WP** confers warm and waxy touch to the leather. Leather defects are effectively masked due to the darkening provided by it after plating. Leathers coated with **WAXOL WP** do not develop bad smell even on prolonged ageing.

The leather coated with **WAXOL WP** may be finished lightly with carefully prepared season of protein or resin binders followed by fixing with formalin or lacquer emulsion. Passing through contilux will result in the leather having pleasant handle and gloss.

#### SUGGESTED APPLICATIONS :

Apply as such on snuffed leathers with the help of heated roller coating machine. Air off over night, kiss plate at high temperature, apply one more coat if required, contilux at 125°C/50 bar.

**Note :** Suggested formulations are only for guidance and necessary modifications must be made to achieve a particular result.
