PROTEIN
BINDERS

GLAZE TOP EC is a medium soft protein binder containing anti-sinking agents. This property makes it highly suitable for the hungry grained or slightly snuffed leathers. It also has very good filling, covering and levelling effect.

GLAZE TOP EC imparts better gloss and touch to the finished leather. It also reduces the tack of the resin finishing season.

GLAZE TOP EC can be fixed in the normal way with fixatives like formaline or crosslinkers.
