**PROTEIN  
BINDERS**

**GLAZE TOP N** is a fairly soft protein binder containing wax like products and hence imparts very good waxy feel to the treated leathers. This property makes it very much suitable for polished nappas. It has very good filling and covering power with good levelling effect.

**GLAZE TOP N** imparts silky touch and gloss to the finished leathers. It also reduces the tack of resin finish leathers when used into the normal resin season. It can be fixed with fixatives like formalin or crosslinkers.
