LUBER LMC

LUBER LMC is a blend of synthetic and natural oils which gives good pull up effect when applied on leather.

PROPERTIES:

Appearance	: Brown Liquid
Nature	: Synthetic and Natural Oils Solvent Dilutable
Solid Content	: 98 ± 1%
pH 10% Emulsion	: N.A.
Shelf Life	: Six months

LUBER LMC is a specially blended oil based product which imparts good pull up effect on ironing when applied as such or by diluting in solvent to full grain or on slightly snuffed leathers.

LUBER LMC helps in effective masking of grain defects of leather and have good softening properties. It imparts a characteristic greasy touch to the treated leather. The product is normally applied by roller coating machine.

The treated leathers must be aged at least 12 hours before further coating if a second coat is necessary to achieve the particular result. Leather coated in this manner may be plated at 100°-120 °C/50 bar or Finiflexed at 130 °C with minimum pressure after complete drying and proper ageing, to achieve darkened leather having good pull up effect and pleasant touch.

PULLUP
OILS &
AUXILIARIES

The leather treated with LUBER LMC may also be finished with carefully prepared season of protein or resin binder followed by fixing. Passing through contilux will improve the handle and gloss of leather. Leather finished with LUBER LMC do not give pungent or bad smell even on prolonged ageing.

SUGGESTED APPLICATION:

For Greasy Oily Pullup: Direct roller coat (on snuffed leather). Air off over night, kiss plate, spray one cross coat, air off, contilux at 125 °C/50 bar.

Note : Suggested formulations are only for guidance and necessary modifications must be made to achieve a particular result.
