LUBER - SAS

LUBER - SAS is a phosphated fatliquoring agent which imparts very high softness and full, wet and waxy feel to the leather.

CHARACTERISTICS:

Appearance	: Yellowish Liquid
Base	: Phosphated Synthetic Oil
Active Content	: 65 ± 1%
pH (1 : 10)	: 7.5 ± 0.5
Charge	: Anionic
Stability	: Very Good
Light Fastness	: Excellent
Shelf Life	: Six months

LUBER - SAS is an anionic fatliquor based on phosphated synthetic oil and provides internal softness, fullness roundness and suppleness to the leather in addition to wet and waxy surface feel.

It is fairly stable to salts and electrolytes and hence may be added in small doses (about 1 to 2%) during rechroming or neutralisation to optimise the softening effect. It also helps in obtaining level dyeing.

LUBER - SAS has excellent lightfastness and may also be used for producing white and pastel coloured leathers in conjunction with other lightfast fatliquors.
