

## HARYANA

### NANO PIGMENTS – ‘NA’ SERIES

**High concentration - Amphoteric pigment dispersions for cationic & anionic finishing system.**

**NANO ‘NA’** series pigments are an innovative concept used for cationic or anionic finishing system. These are amphoteric pastes and totally casein free hence recommend for very high quality Nappa or Upholstery leathers.

**NANO ‘NA’** series have very high concentration yet maintain a free flow due to special types of polymeric dispersants use in formulation.

The range of organic and inorganic shades enhance their versatility for various finishes. The extra fine grinding provides gloss, colour strength, flocculation stability and anti-flooding behaviour.

Following shades are available based on single component products to ensure batch to batch consistency. Complete colour matching support is available as per customer's requirements:

Product	Solid Content	pH	Nature
Nano Black NA	28 ± 1%	7.0 ± 0.5	Organic
Nano Brown NA	70 ± 1%	7.0 ± 0.5	Inorganic
Nano Blue NA	28 ± 1%	7.0 ± 0.5	Organic
Nano Yellow NA	28 ± 1%	7.0 ± 0.5	Organic
Nano Red NA	28 ± 1%	7.0 ± 0.5	Organic
Nano White NA	76 ± 2%	7.0 ± 0.5	Inorganic

Shelf Life of NANO ‘NA’ series pigments is six months if stored in cool / dry place in air tight containers.
