SINTOL - D

SINTOL - D is a semi-synthetic fatliquor which provides good body and softness to the leather, specially suitable for splits & industrial gloving leathers.

CHARACTERISTICS:

Appearance	: Light Brown
Base	: Sulphited Blend of Semi Synthetic Oils
Active Content	: 40 ± 1%
pH (1 : 10)	: 8.5 ± 0.5
Stability	: Very Good
Light Fastness	: Good
Shelf Life	: Nine months

SINTOL - D is a blend of semi-synthetic oils which has been specially developed for splits and industrial gloving leathers or milled or printed leathers. It provides good body and softness to the treated leathers and can be used as a general purpose fatliquor for the production of the various types of leathers to reduce the cost of fatliquoring components.

SINTOL - D is fairly stable to acids, salts and hard water and hence can be used at various stages of leather processing. It is a fairly lightfast product and can be used for the production of white and pastel colour leathers. If used for white leather, it leaves the pure white colour without making them yellowish in tone.

CONVENTIONAL
FATLIQUORS

EMULSION INSTRUCTIONS:

To the required quantity of **SINTOL - D** add slowly, three times of its own weight of water at 60 °C, while stirring.

SUGGESTED APPLICATIONS:

a) Cow Industrial	Fatliquoring	4.0 %	SINTOL-D
Gloving		9.0 %	Glovol AS 29
		2.0 %	Luber-SAS
b) Cow Printed Mill	Fatliquoring	5.0 %	SINTOL-D
		4.0 %	Luber-SN
		2.0 %	Maradol-C
