

TOP 46

Highly concentrated - solvent dilutable - high gloss top finish.

PROPERTIES:

Appearance	: Light Straw Coloured Solution
Nature	: NC in Solvent
Solid Content	: 42 ± 1%
pH (10% Sol.)	: N.A.
Flexibility	: Medium
Film Hardness	: Medium soft
Gloss	: Very bright
Shelf Life	: Six months

TOP 46 is a straw coloured solvent dilutable lacquer formulation. It imparts high gloss, soft handle and good fastness properties. Leathers topped with **TOP 46** can be ironed with Finiflex for further improvement of gloss.

TOP 46 has good plasticizing power and, therefore, further addition of plasticiser is not necessary.

SUGGESTED APPLICATIONS:

TOP 46 is an excellent top coat for resin finished leathers. It can be diluted with true solvents and other diluents in the ratio of 1:4 to achieve good results. The product mixes well with slip agents like Modifier 32 and application of such mix after dilution in the usual manner produces leather with good smooth surface feel.

Recommended plating temperature for this lacquer is upto 70°C (100 Kg/cm²) at which it produces good gloss and feel.
