FINISH M 45 is a non-ionic feel modifier based on amino silicone emulsion and also suitable for polishing ground in cationic finishing system.

FINISH M 45 is a non-ionic, non-yellowing, feel modifier to impart permanent slippery feel to the treated leather if used as top coat. It increases resistance to wet / dry rub, scuffing and can withstand milling well. It can also be safely used in cationic finishing system, in season or polishing grounds, where it improves the polishability, helps in reducing the tack and confers good feel to the leather.

FINISH M 45 can also be used with other modifiers to alter the final feel of leather. It is also an auxiliary of choice in lacquer emulsion for improving the flow and feel.
