

MODIFIER CA/2

Characteristics of Emulsion

Appearance	: White Paste
Nature	: Mildly Cationic
Solid Content	: $9 \pm 1\%$
pH (10 % sol.)	: 7.5 ± 0.5
Mechanical Stability	: Good

Water Based mildly cationic feel modifier for a soft, and waxy touch. Also works as auxiliary in the season for full cationic finishing system.

MODIFIER CA/2 is a mild cationic feel modifier for top coats to impart a soft handle and slightly waxy touch that is permanent. It's mostly used alone but may be combined with other modifiers like Finish M45 to get different variants of slip and waxy feel on leathers ranging from garments to upper. It does not affect the light fastness and does not affect adversely the natural look of leather.

MODIFIER CA/2 can also be used as a waxy auxiliary in cationic finishing season, where it improves hold up and confers warm and waxy feel. Compatibility of Modifier CA/2 with anionic products should be checked on case to case basis before its use.

Usage

Cationic Season	:	10 parts Black NA	
		40 parts Novocat Black R	
		30 parts Modifier CA/2	
		20 parts Celina 34 KT	
		100 parts Brillento 91 KT	
		660 parts Water	
		75 parts Acril-m KT 35	2 to 3 X coats,
		75 parts PUD 48 KT	dry well, Finiflex.
Top Coat	:	150 parts Modifier CA/2	
		100 parts Finish M 45	
		750 parts Water	1 to 2 X coats,
			dry well, Finiflex
