

SOFTNER SN

A good penetrating softener used before assemblage for all types of uppers. It is a perfect blend of synthetic light oils, surfactants and plasticizers in water solution. It is to be applied on the flesh-side of the leathers before assemblage. It imparts good softness with excellent feel, light fastness and stability. Well suited for fatliquored boots and trekking shoes, as it prevents the grain and finish from cracking and gives the uppers more elasticity and internal softness. Even after lasting and drying, the upper remains supported and perfectly shaped.

- Characteristics :
- High penetrating softener fluid as Emulsion
 - Imparts excellent softness and feel
 - Prevents the grain & finish from cracking
 - Gives more elasticity and internal softness
 - Does not allow to alter the appearance of grain

Physical Properties :

Appearance	: Amber fluid
Solubility	: Soluble in water
Active %	: 64 ± 2
pH	: 7.5 ± 0.5 (10% Emulsion)

- Procedure :
- Clean the surface of flesh-side thoroughly
 - Apply **Softner SN** on the flesh-side by spray / brush
 - Allow time between application and assemblage
 - Keep the surface open to dry completely
 - Can be used even after cutting the components
 - Do not apply on the grain-side (upper side)

Packing : 1 kg in plastic Bottle | 10 kg in plastic Jerrycan | 30 kg in HDPE Drum
 Storage : Store between +5° c – 35° c in original pack, well sealed & stored.
 Shelf-life : Product is stable for 9 months from the date of production/invoice.

REACH Compliant

Non flammable

Store in Shade

Prevent from freezing

Use Gloves / Ensure Ventilation
