B) TECHNOLOGY ABSORPTION:

a) Research & Development (R & D)

1. Specific area in which R & D was carried out:

The Company undertook research activity in the field of (1) Improving rheological stability and shelf life of products across all segments (2) Next generation of Fat liquor for ultra-soft gloving and upholstery leather As planned, an internal team identified various testing instruments in Rheology (flow) and Zeta Potential measurements as these parameters are important to dispersion stability and flow behaviour. A list of product candidates was shortlisted for testing and correction. Working In collaboration with Anton – Parr experts on rotational Rheometer, the product to product weakness was identified and a strategy to strengthen dispersion network within the product was developed. Besides this, evaluation of additives like Nano Clay, gelling agents from BYK Germany was carried out and their suitability to build stability network was

ascertained. Based on the findings, the Company made investments in required test equipment and set up a new laboratory to test and correct the products to improve shelflife. The work is ongoing.

The Company also completed development of a new fat liquor to address the market need for gloving and upholstery segment. The key benefit of this product will be much higher softness and lower loading of effluent treatment plants due to much lower COD levels. The product has been produced at pilot scale , sampled and tested by some key customers with very high satisfaction.

2. Benefits derived as a result of above R&D:

This type of dispersion stability analyses are first of its kind and will reinforce the quality and performance across many segments of Company's product range. This will improve product acceptability in those countries where the product is subject to extremely low or high temperatures during storage or transport. The development of "next generation" fat-liquor will place the Company in the top league of global producers of performance fat liquors. The key benefit of this product will be much higher softness and lower loading of effluent treatment plants at the customer end due to much lower COD levels.

All these combined improvements combined will improve market share, competitiveness and sales growth and Company is "future ready".

3. Future Plan of Action:

The Company's R & D plan for the year 2020-21 revolves around exploring new testing technologies to detect un-reacted ingredients (at trace level) to improve safety and volatile emission at the user's end. Pursuing these goals, two specific R & D projects have been planned as per following brief information: Detection of free Hydrazine in Polyurethane dispersions using chromatography or spectrophotometric techniques. Based on detection levels, a strategy to neutralise unreacted Hydrazine will also be developed. Detection of Free Monomer in Acrylic Dispersions and methods to neutralise all unreacted monomer using High Performance Liquid Chromatography (HPLC).

These product improvements will render Company's products even more safe during their usage and will reduce VOC emissions at user end.

4. R&D expenditure

a.	Capital	: . 7.70 lacs
b.	Recurring	: 43.67 lacs
c.	Total	: 51.37
d.	Total R&D Expenditure	: 1.84% As percentage of total turnover

MANAGEMENT DISCUSSIONS AND ANALYSIS REPORT

1. Industry Structure:

The Leather Industry is closing the fiscal year 2020-2021 with a decline of approx.27% in exports. During this fiscal year the exports are at USD 3681 million dollars as compared to USD 5070 million for the previous fiscal year 2019-20. The reason behind this decline is prolonged period of market shut down worldwide due to pandemic. In spite of the adversities, the initial period of fiscal year 2021-22 reported some growth and the Company hopes to sustain this trend in the coming months.

The pandemic has improved India's standing in the global market as a reliable supplier of high-quality goods. Hence, there are good prospects for the growth of the leather, leather products and footwear industry in the near future.

2. Opportunities & Threats:

Opportunities:

The leather industry in India accounts for around 13% of the world leather production of hides/skins and handles a robust annual production of about 3 bn sq ft of leather. The industry is known for its consistency in high export earnings and it is among the top ten foreign exchange earners in the country.

With some of the leading markets such as Italy, Spain and Germany opening up, India is in advantageous situation given the current negative sentiments against China. India should not miss this opportunity.

Threats:

Some of the challenges that Indian leather industry face are:

a) Low level of modernization, up-gradation, and integration of developed technology is very slow.
b) Low level of labor productivity due to inadequate formal training to unskilled labor.
c) Effluent management, non-tariff barriers, quality specifications and cost of compliance to various safety standards hinder the export growth of Indian leather industry.
d) Environmental issues associated with leather tanning and other processing.
e) The revamp of leather processing technologies is very slow as it depends on synchronized accomplishment of environmental, social, and economic goals.

3. Segment-wise or product-wise performance:

In the Finishing Chemicals segments, Company's compact finishes and lacquers are very well recognized in the export market - especially in countries like Russia and Uzbekistan. The Company foresees further increase in demand due to shortage of Acrylics and Lacquers in the world market.

In the Powder Syntan segment, Company has shown growth in export especially to Brazil and Bangladesh - in spite of several adverse conditions viz., Covid-19, unprecedented raw material increase and highly fluctuating freight costs.

The Company continues to maintain its market share in high performance wet end products. But the raw material prices of these wet end products have increased substantially and continue to show upward trends. Company is not able to pass on this hike in raw material prices to its customer fearing loss of some market share. This segment is under constant watch and company is keeping a close eye on the raw material price trends on daily basis.

4. Outlook:

Leather is one of the most widely traded commodities globally. The growth in demand for leather is driven by the fashion industry, especially footwear. Apart from this, furniture, and interior design industries, as well as the automotive industry also demand leather. The leather industry has a place of prominence in the Indian economy due to substantial export earnings and growth.

The Indian leather industry has grown drastically, transforming from a mere raw material supplier to a value-added product exporter. The Indian leather industry accounts for around 12.93% of the World Leather production of hides\skins.

5. Risks & Concerns:

Major Challenges apart from the current pandemic for the leather industry in India are:

a) Production has declined due to unfavorable government policies and environmental issues.
b) Indian leather industry is also facing problems in adapting fast changing fashion trends.
c) Challenges from synthetics.
d) Perpetual dependence on western markets.
e) Inelastic supply of raw materials.
f) Low level of modernization, upgradation, and integration of modern technologies.
g) Horizontal growth of tanneries with a smaller number of organized brands and products.
h) Weak logistic infrastructures for export

6. Internal control systems and their adequacy:

Company's internal control focused on reliable financial reporting, and compliance with laws, regulations, and

policies.The accounting and auditing assured achievement of operational effectiveness and efficiency. Management information systems, demand forecast, purchase and production planning are integrated with SAP based system with transparency of data for key personnel. The data security has been tightened online or offline.

Regular reconciliation of stocks and receivables resulted in improved cash flow, timely payment to creditors. Stricter cost control measures, monitoring of financial transactions and logistics cost resulted in significant savings.

7. **Discussion on financial performance with respect to operational performance:**
The decrease in profit as compared to last year is mainly due to: (a) reduction of sales due to prolonged shut down of markets - both domestic and worldwide, (b) substantial increase in raw material cost, freight cost and energy cost. The Company has not passed on these price increase to their customers fully to remain competitive in the market.
8. **Material developments in Human Resources / Industrial Relation front, including number of People employed:**
The Company's talent pool remains adequate and is concentrating on more specialized knowledge on laboratory practices, ISO Quality systems and production efficiency . The Company has also retained foreign experts as consultants for technology developments. There is no attrition at the level of senior technical and management and professionals. There are no unresolved grievances of workers who have exhibited strict discipline and cordial relations with the management. Increments have remained aligned with market trends across all levels of employees, but some year-end incentives had to be reduced to prepare for unforeseen cash flow problems due to pandemic. All the employees of the Company are fully vaccinated.

Number of employees as on 31.03.2021 was 87.

In our opinion and to the best of our information and according to the explanations given to us,the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Actread with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS")and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and its profit, total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made there- under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. we have determined that there are no key audit matters to be communicated in our report.

Information Other than the Financial Statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the [information included in the Annual Report, but does not include the standalone financial statements and our auditor's report thereon.
- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilityfor the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The directors of the Company do not expect that the adoption of the amendments to the standards will have an impact on the financial statements of the Company.

3) Significant accounting policies

3.1 Statement of Compliance

The financial statements have been prepared in accordance with Indian Accounting Standards ('Ind AS') notified under section 133 of the Companies Act 2013, read together with the Companies (Indian Accounting Standards) Rules, 2015.

3.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis.

Historical Cost is generally based on the fair value of the consideration given in exchange of goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company taken into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

3.3 Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for returns, trade allowances for deduction, rebates, goods & service tax and amounts collected on behalf of third parties.

Operating Income

Revenue from sale of manufactured products is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on delivery of the goods. The Company collects Goods & Service Tax (GST) and other taxes on behalf of the government and, therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from revenue.

Interest income

Interest income is recognized on accrual basis.

3.4 Foreign currencies

Foreign Currency transactions are recorded at the exchange rate prevailing at the date of transaction and monetary items denominated in foreign currency are restated at rates prevailing on the date of balance sheet. The exchange fluctuation arising is shown as "Foreign Exchange Fluctuation Gain / (Loss)" in the

statement of profit and loss as per the requirement of IndAS 21 "The Effects of Changes in Foreign Exchange Rates."

3.5 Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All borrowing costs are recognized in the statement of profit and loss in the period in which they are incurred.

3.6 Government grants

Government grants are not recognized until there is reasonable assurance that the Company will comply with the conditions attaching to them and such grants can reasonably have a value placed upon them.

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Company recognises as expenses the related costs for which the grants are intended to compensate.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Company with no future related costs are recognized in profit or loss in the period in which they become receivable.

3.7 Employee benefits

i) Retirement benefit costs and termination benefits

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans like provident fund and Employee State Insurance, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at each Balance Sheet date.

Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and is not reclassified to the statement of profit and loss. Past service cost is recognized in the statement of profit and loss in the period of a plan amendment.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement

The company presents the first two components of defined benefit costs in the statement of profit and loss in the line item 'Employee benefits expense' and "Finance Cost" respectively. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognized in the balance sheet represents the actual deficit or surplus in the company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognized at the earlier of when the company can no longer withdraw the offer of the termination benefit and when the company recognizes any related restructuring costs.

ii) **Short-term and other long-term employee benefits:**

A liability is recognized for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognized in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the company in respect of services provided by employees up to the reporting date.

iii) Contributions to provident fund

The Company makes contributions to statutory provident fund in accordance with Employees Provident Fund and Miscellaneous Provisions Act, 1952. Provident Fund is a defined benefit scheme the contribution of which is being deposited with "Employees Provident Fund Organisation"; such contribution to the organisation additionally requires the Company to guarantee payment of interest at rates notified by the Central Government from time to time, for which shortfall, if any has to be provided for as at the balance sheet date.

3.8 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

i) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The current tax is calculated using tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates.

ii) **Deferred tax**

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in computation of taxable profit.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

In the case of unused tax losses probability is evaluated considering factors like existence of sufficient taxable temporary differences, convincing other evidence that sufficient taxable profit will be available. At the end of each reporting period, the companyreassess unrecognized deferred tax assets and, the company recognizes a previously unrecognized Deferred Tax Asset to the extent that it has become probable that future taxable profit will allow the Deferred Tax Asset to be recovered.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable company and the same taxation authority.

iii) Current and deferred tax for the year

Current and deferred tax are recognized in the statement of profit and loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

3.9 Property, plant and equipment(PPE)

For transition to Ind AS, The Company has elected to continue with the carrying value of all of its PPE recognized as of 01 April, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

Land and Building held for use in the supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses.

Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Freehold Land is not depreciated

PPE are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

Components of costs

The cost of an asset includes the purchase cost including import duties and non-refundable taxes, borrowing costs if capitalization criteria are met and any directly attributable costs of bringing an asset to the location and condition of its intended use.

Subsequent expenditure related to an item of PPE is added to its carrying value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance.

All other expenditure related to existing assets including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss in the period during which such expenditure is incurred.

The carrying amount of a PPE is de-recognized upon disposal of PPE or when no future economic benefits are expected from its use. Any gain or loss arising on the disposal or retirement of an item of PPE is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the statement of profit and loss.

Depreciation commences when the assets are ready for their intended use. Pursuant to the applicability of Schedule II of the Companies Act, 2013, depreciation on all PPE except land are provided on a straight line method based on the estimated useful life of PPE.

Residual values of assets have been considered at 5% of the original cost of the assets.

The depreciation calculation is based on the balance useful lives of assets and shift working. Depreciation on assets used on double shift basis have been increase by 50% for that period and Depreciation on assets used in triple shift basis have been increase by 100% for that period, except for assets in respect of which no extra shift depreciation is permitted (indicated by NESD in Part C of the schedule).

The useful life of PPE are reviewed at the end of each reporting period if the expected useful life of the asset changes significantly from previous estimates, the effect of such change in estimates are accounted for prospectively.

3.10 Inventories

Raw materials have been valued at cost on FIFO method.

Stores & Spares and Packing material have been valued at cost on FIFO method.

Work in Process has been valued at Raw material cost plus proportionate conversion cost.

Finished Goods lying at factory have been valued at Raw material cost plus conversion cost.

3.11 Provision

Provisions are recognized when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that the company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

3.12 Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

3.13 Segment Reporting

The Company is in the business of manufacturing of leather chemicals which is the only reportable business segment as per Ind AS 108 'Operating Segments'.

3.14 Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares.

Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders of the Company by the weighted average number of common shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to equity shareholders and the weighted average number of equity shares outstanding, for the effects of all dilutive potential equity shares. For the purposes of calculating basic EPS, shares allotted to ESOP trust pursuant to employee share based payment plan are not included in the shares outstanding till the employees have exercised their rights to obtain shares after fulfilling the requisite vesting conditions. Till such time, the shares are allotted are considered as dilutive potential equity shares for the purposes of calculating diluted EPS.

Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease earning per share from continuing operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented.

3.15 Operating cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

3.16 Financial Instrument

Financial assets and financial liabilities are recognized when a Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at Fair Value Through Profit & Loss (FVTPL).

However, financial liabilities that arise when a transfer of a financial asset does not qualify for de-recognition or when the continuing involvement approach applies, financial guarantee contracts issued by the Company, and commitments issued by the Company to provide a loan at below-market interest rate are measured in accordance with the specific accounting policies set out below.

Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognized in 'Other income'.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognized in profit or loss.

Cash and cash equivalents (for the purpose of Cash Flow Statement)

Cash and cash equivalents in Cash Flow Statement comprise cash at bank and in hand and fixed deposits with banks, which are subject to an insignificant risk of changes in value.

Due to lockdown situation in India, we were prohibited to manufacture the products for our customers towards the end of March which continued till April 2020. Partial resumption of operations started in the first week of May 2020 which has been gradually increased overtime.

c. Raw Materials: The company has sufficient raw materials across its plant and does not foresee any impact on manufacturing operations on account of unavailability of raw materials.

3. **Financial resources, profitability and liquidity position:**
   a. There may be some impact on receivable cycle from customers however, the company foresees no major risk given its high quality of customers & strong Balance Sheet to support operations.
   b. The Company has also implemented cost control measures across the organization to conserve cash to address any evolving situation resulting from the pandemic.
   c. The Company is also in constant touch with its key vendors and is working with them to mutually partner each other in such unprecedented times.

4. **Estimation of the impact of COVID-19 on operations:**

a. We believe there will be impact in revenue and profitability for Q1FY21 as our operations were shut in April 2020 and were gradually started in May 2020.

b. Considering the fact that the situation is exceptional and is changing dynamically, the Company is not in a position to gauge with certainty, the future impact on its operations. However, the Company is confident about adapting to the changing business environment and respond suitably to fulfil the needs of its customers.
