Waxy Protein Binder Incorporating feel modifier for a very natural aspect and handle.

GLAZE TOP N is a fairly soft protein binder containing a special wax for imparting an exceptionally smooth, pleasant and waxy feel to the treated leathers. It has very good filling and covering power with good levelling effect. It can be used alone in glazing and polishing finishes. It allows outstanding plating and good dry milling properties.

GLAZE TOP N also reduces the tack of resin finish leathers, improves feel when used into the normal resin season. It can be fixed with fixatives like formalin or crosslinkers.
