Water dilutable modified wax emulsion for light to medium "oil / waxy pull up" effect.

PULL-UP WAX 58 is a watery emulsion of high congealing point waxes which can be used for the crunch finish on the leather and also as an additive in pull up finishes. It offers light to medium pull up effect, a subtle oily feel and facilitates high temperature plating in resin finish. It also finds its use in protein finishes for a waxy smooth feel.

PULL-UP WAX 58 can be used alone or diluted with water or thinner (Butyl Acetate). It can be blended as additive to effect moderation with other Pull Up oils and waxes after verifying compatibility.
