

PULLOL 411

Characteristics

Appearance	: Amber Coloured Liquid
Nature	: Synthetic and Natural Oils in Solvent Medium
Solid Content	: 92 ± 1%
pH	: N.A.

PULLOL 411 is a solvent dilutable pull up oil which has natural and synthetic components for obtaining "Bright Pull-up" finishes.

PULLOL 411 imparts bright pull up effect when applied to full grain or on slightly snuffed leathers. It effectively produces a good pull up effect on hard to wet leathers maintaining a slightly oily touch. It is characterised by its good filling, masking and softening properties. Leather produced with Pullol 411 does not give any strong oily odour or fouling smell even on prolonged ageing.

PULLOL 411 coated leathers can also accept subsequent finishing. Leathers may also be finished with carefully prepared seasons of Glaze Top N (25-30 g/ltr. with water) followed by fixing with cross linking agents. Passing through Contilux will result in pleasant handle and good gloss.

Usage

Pullol 411 can be applied on its own or by diluting it with Butyl glycol. The treated leather must be aged at least for 12 hours and plated at 100°-120°C/50 bar or Finiflexed at 130°C with minimum pressure to achieve darkened leather, having good pull up effect and fairly pleasant touch.
