*General Purpose Fatliquor - phosphated & synthetic blend - for deep softness, damp / waxy feel.*

GLOVOL HSN is an anionic fatliquor based on a phosphated and synthetic oil blend which provides inner softness, fullness, suppleness and pleasant damp surface feel to the leather without making it loose. It is odourless and also helps in obtaining level dyeing.

GLOVOL HSN has excellent lightfastness, no ageing problems or spewing, and is safe for producing white and pastel coloured leathers in conjunction with other lightfast fatliquors. It is fairly stable to salts and electrolytes and hence may be added in small doses (about 1-2%) during rechroming or neutralization to optimise the softening effect. Generally compatible with vegetable and mineral tanning compounds.
